Amrinder Singh presently working as, Assistant Professor of History under the School of Social Sciences. He has published research paper in National Conference and attended several Conferences.

Subject Group/Research projects

History and Archaeology of Punjab region.

Archaeological Studies of Harappan Civilization

The focus of my research can be broadly described as Ancient History and Archaeology of Punjab. How one of the world greatest civilizations (Harappan Civilization) expands its footprints in the region of east Punjab. My focus is mainly on the district of Malwa region of Punjab, which is very rich from archeological point of view. I conducted village to village field survey and discovered new Harappan sites in Derabassi tehsil. I start my research from my village and find the fascinating discovery of human skeleton, pottery, beads, toys, copper harpoon, and other antiquity of Harappan period.
